LIGHTING DIRECTORY - 2025

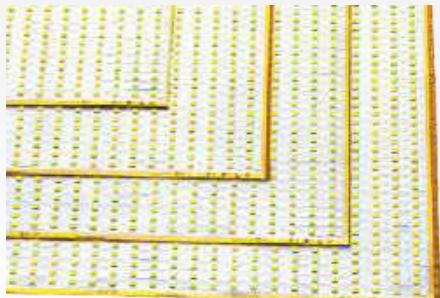

LIGHTING UP THE FUTURE

Buy Panel Light PCB's at Very Reasonable Price

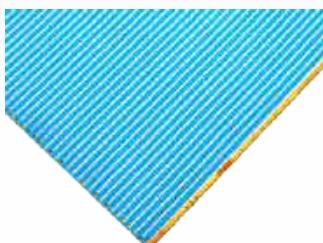

Available in CW / NW / WW

6W / 8W	288mm / 331mm
12W / 15W	436mm / 525mm
18W / 22W	591mm / 726mm
12W(5")	366mm / 436mm
18W(7")	500mm / 610mm
24W / 30W	414mm / 507mm

With Blue Thermal Tape
for better heat conductivity

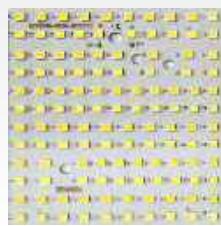

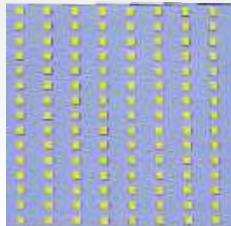

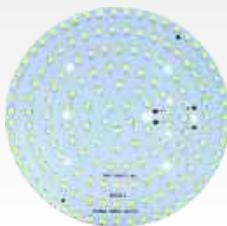

3 in 1 Flexible PCB For Slim Panel Light

6W	288mm / 331mm
11W/12W	366mm
12W	438mm / 525mm
18W	591mm / 726mm

PC Panel MC PCB

4" - 8W - 82mm
5" - 12W - 113mm
6" - 15W - 132mm
8" - 22W - 187mm

Available in CW / NW / WW

3 in 1 MCPCB

8W

Input : 90-265V
Output : 40-68V - 120mA
Surge : 2.5kV

8-24W

Input : 90-265V
Output : 24-80V - 280mA
Power Factor : >0.9
Surge : 4kV

4-W 3 in 1

Input : 90-265V
Output : 10-25V - 280mA
Surge : 2.5kV

8W 3 in 1

Input : 90-265V
Output : 40-68V - 120mA
Surge : 2.5kV

12-15W 3 in 1

Input : 90-265V
Output : 90V - 190mA
Surge : 2.5kV

8-24W 3 in 1

Input : 90-265V
Output : 24-80V - 280mA
Surge : 2.5kV

From Vision to Reality:

Illuminating the Indian Lighting Industry

Dear Esteemed Members and Colleagues,

It is with immense pride and exhilaration that we present this inaugural edition of the ILA Lighting Directory. This moment marks a significant milestone in our journey to unite and empower the diverse landscape of the Indian lighting industry.

For too long, the Indian lighting sector, despite its vibrant growth and innovation, has operated in fragmented silos. While various associations have commendably served their regional or categorical niches, a truly comprehensive and inclusive platform remained an aspiration. It was this very need that sparked the genesis of ILA – a vision to bring all lighting and component manufacturers and suppliers onto a common platform, fostering collaboration, knowledge exchange, and unparalleled business opportunities.

What began as a simple idea blossomed into a powerful movement, starting with our dynamic ILA WhatsApp group. This digital hub quickly became a testament to the industry's desire for connection, evolving into a highly active forum for business networking, efficient supplier searches, and invaluable knowledge sharing. The enthusiastic participation of nearly 100% of suppliers in this group underscored the critical demand for a unified voice and a shared space. We further solidified these connections through our newsletter, keeping our members informed and engaged.

Today, we take a monumental leap forward. For the very first time in India, we have meticulously compiled the data of virtually every lighting and component manufacturer and supplier into a comprehensive directory. This isn't just a collection of names and numbers; it's a testament to our collective strength and a beacon of clarity in a complex market.

We are incredibly excited to announce that this directory is not confined to print. Recognizing the demands of our fast-paced world, it is also readily available in a dynamic digital format. This dual accessibility ensures that whether you prefer the tangible feel of a book or the instant access of a digital search, this directory will be your indispensable companion.

Consider this directory your ultimate handbook for navigating the Indian lighting landscape. For suppliers, it offers unparalleled visibility and connection to a vast network of potential partners and clients. For users of lighting products, the days of arduous supplier searches are over. This directory makes finding the perfect component or manufacturer effortless, streamlining your operations and empowering informed decisions.

This directory is more than just a listing; it's a vibrant testament to the power of unity and the exciting future of the Indian lighting industry. We invite you to explore its pages, leverage its resources, and become an active participant in the brighter, more connected future we are building together.

DILUCY LIGHTING

THE LANGUAGE OF LIGHT

Light. Crafted. Custom.

Fabric lights for the new era of design

Step into a world of crafted elegance with Dilucy Lighting — a brand redefining ambiance through fabric-based lighting solutions.

Crafted using natural fabrics like jute, cotton, and banana leaf, our lights are eco-friendly and artisanal. From minimal cotton textures to printed silks and nature-inspired forms like our Banana Leaf Series, every piece is individually handcrafted to bring design, warmth, and personality into your space.

Our lights are more than products — they are experiences in glow. Built with precision frames, fine detailing, and premium-grade electrical components, we deliver lighting that blends aesthetic and functionality effortlessly.

Residential. Commercial. Custom Projects.
Fabric lights that fit your space. And your story.

Illuminating Uniqueness

Decorative lighting fabrication is the process of designing, engineering, and manufacturing custom lighting solutions that enhance the aesthetic appeal of spaces while fulfilling functional illumination requirements. This specialized craft merges creativity with precision engineering to deliver unique lighting features tailored to diverse architectural and interior design visions.

"Empowering Brands with Brilliance – Your Partner in LED Lighting OEM & SKD Solutions"

We Build Your BRAND's Brightest FUTURE

KALP
Lighting Pvt. Ltd.

PREMIUM ARCHITECTURAL LED LIGHTS

At Kalp, we specialize in OEM & SKD manufacturing of LED lighting products – from flood lights to spotlights, linear lights to profiles.

Our state-of-the-art facilities, rigorous quality control, and customizable solutions ensure your brand delivers excellence, every time.

Whether you're launching a new product line or scaling existing operations – we're your behind-the-scenes power.

Dimming Technologies in Lighting for Smart & Intelligent Luminaires

Biju John

Lighting control has evolved significantly over the years, and dimming technologies have become an integral part of modern lighting solutions. Whether it's for energy efficiency, human-centric lighting, or aesthetic preferences, dimmable LED drivers and control protocols play a crucial role in providing the desired illumination levels.

This article explores various dimming technologies used in LED drivers, including industry-standard protocols and communication methods for dimming luminaires in smart lighting systems.

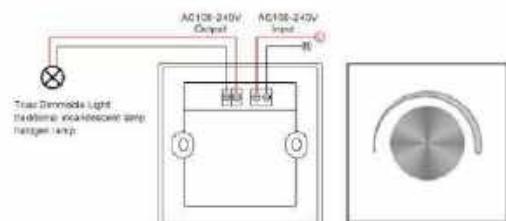

Types of Dimmable LED Drivers

LED drivers control the power supply to LEDs, and dimmable drivers allow adjustable brightness while maintaining efficiency and performance. Below are the most commonly used dimming technologies in LED drivers:

1. TRIAC Dimmable Drivers

- Technology:** Phase-cut dimming (leading-edge or trailing-edge)
- Common Use:** Residential and retrofit applications
- Compatibility:** Works with traditional wall dimmers
- Limitation:** Limited dimming range, may cause flickering if not matched properly

TRIAC Dimming: Control TRIAC-enabled lamps through a TRIAC dimmer

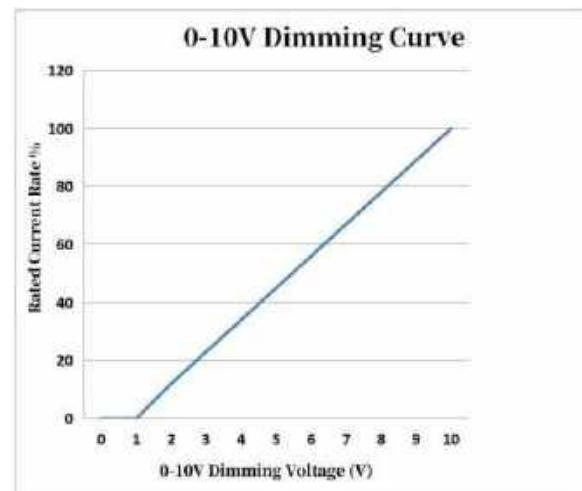

TRIAC (Triode for Alternating Current) dimming is one of the oldest dimming technologies. It is commonly found in AC phase-cut dimming systems, making it ideal for use with existing wall dimmers in homes. However, it has limitations in terms of compatibility with modern LED drivers, which may lead to flickering or buzzing if not designed properly.

2. Analogue 0-10V Dimmable Drivers

- Technology:** Uses a 0 to 10V DC signal to adjust brightness
- Common Use:** Commercial, industrial lighting
- Compatibility:** Requires a separate control circuit
- Limitation:** No two-way communication; limited control

The 0-10V dimming system operates by sending a low-voltage signal (0V for off, 10V for full brightness). It is simple and reliable but lacks advanced features such as two-way communication and scene-setting capabilities.

3. PWM (Pulse Width Modulation) Dimmable Drivers

- Technology:** Adjusts LED brightness by switching the current ON/OFF rapidly
- Common Use:** Architectural, high-end lighting applications

- **Compatibility:** Works with digital control systems
- **Limitation:** Requires specialized drivers; may introduce EMI (Electromagnetic Interference)

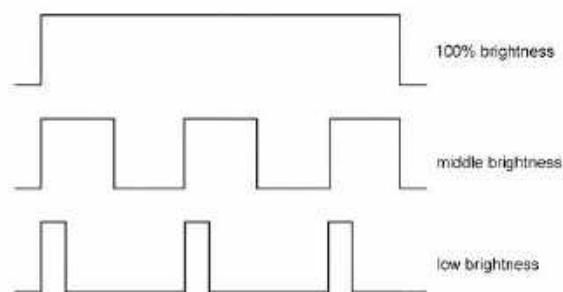

PWM dimming is one of the most precise methods for dimming LEDs. It controls brightness by varying the duty cycle of the current, ensuring consistent color temperature and brightness levels. However, improper PWM dimming may cause visible flicker and electromagnetic interference (EMI) in sensitive environments.

4. DALI (Digital Addressable Lighting Interface)

Dimmable Drivers

- **Technology:** Digital two-way communication
 - **Common Use:** Commercial, office, smart lighting
 - **Compatibility:** Requires a DALI controller
 - **Limitation:** More expensive than analogue dimming
- DALI (Digital Addressable Lighting Interface) is an international standard (IEC 62386) that allows advanced individual control of each luminaire in a lighting system. It supports scene-setting, automation, and energy-saving features.

PWM Dimming

DALI 1.0 vs DALI 2.0: Key Differences

Feature	DALI 1.0	DALI 2.0
Compatibility	Limited	Backward-compatible, improved interoperability
Sensors & Input Devices	Not standardized	Supports sensors, switches, controllers
Certification	No unified standard	Official DiiA certification

DALI 2.0 enhances interoperability, ensuring different manufacturers' products work together seamlessly. It also supports integrated sensors for intelligent lighting solutions.

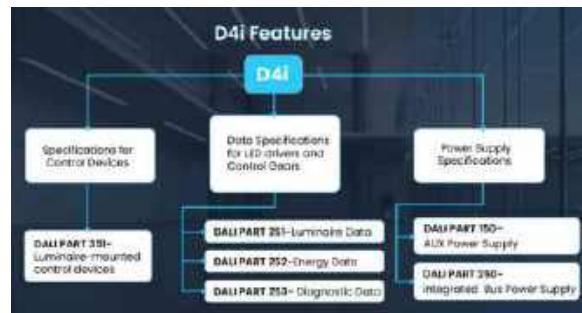

DALI DT6 vs DT8: Understanding the Difference

DALI Type	Function	Application
DALI DT6	Controls single-channel dimming	Standard LED drivers
DALI DT8	Controls color temperature and tunable white	Human-centric lighting, RGBW applications

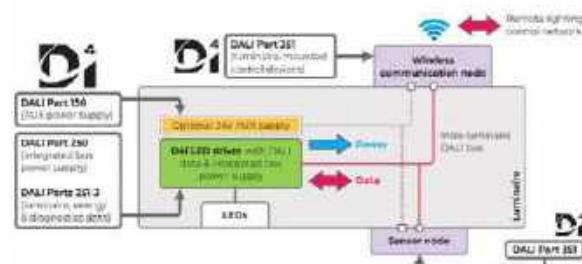

DALI DT8 enables Tunable White and RGB control within a single address, reducing complexity in smart lighting applications.

D4i – Smart DALI for IoT Lighting

D4i is an extension of DALI specifically designed for IoT (Internet of Things) applications. It allows:

- Built-in power monitoring
- Wireless connectivity options
- Interoperability with smart city infrastructure

Protocols for Wireless Dimming of Luminaires

Apart from wired dimming methods, several wireless protocols are widely used to control luminaires in smart buildings and homes.

Protocol	Frequency	Key Features
BLE (Bluetooth Low Energy)	2.4 Ghz	Low power, mobile app control
RF (Radio Frequency)	Varies	Short-range communication
Wi-Fi	2.4 GHz/5 Ghz	High-speed, cloud integration
Z-Wave	908 MHz/868 Mhz	Mesh networking, energy-efficient
Zigbee	2.4 Ghz	Scalable, ideal for large networks
LoRaWAN (Long Range Wide Area Network)	Sub-GHz	Suitable for IoT-based smart lighting
NB-IoT (Narrowband IoT)	Cellular network	Best for city-wide smart lighting

D4i is crucial for smart lighting in cities and buildings, where data analytics and remote control are essential.

DALI+ – Wireless DALI for Future Applications

DALI+ is an upcoming standard that enables wireless DALI communication, making it ideal for retrofit projects where rewiring is difficult. It works over Thread or Bluetooth Mesh networks, bridging the gap between wired and wireless lighting control.

Dimming technologies have transformed lighting control from simple manual adjustments to advanced smart automation. Choosing the right dimmable LED driver and wireless dimming protocol depends on the application—whether it's a home, office, retail store, or smart city infrastructure.

The future of lighting control will continue to evolve with AI-driven adaptive lighting, IoT-based smart lighting, and wireless connectivity. For businesses and lighting professionals, staying ahead of these trends is essential for delivering high-performance lighting solutions.

The world is shifting towards intelligent lighting—are you ready to make the move?

CREATIVE TECHNOLOGIES

Empowered By Innovation

Customized LED Luminaires & Electro-Mechanical Products Manufacturer

Creative Technologies was founded with a clear vision: to deliver high-quality products without compromise. We specialize in the design and manufacturing of electronics, electro-mechanical systems, and LED lighting solutions.

Over the years, we have developed a diverse range of customized products tailored to the needs of retail, household, automotive and project-based applications. What truly sets us apart is our unwavering commitment to quality—never sacrificing standards in the pursuit of lower costs.

We believe that as customers, we expect quality product and service — and as a company, we are committed to delivering just that. Every product that leaves our facility reflects our dedication to durability, reliability, and excellence.

Our loyal customer base stands as a testament to the longevity and dependability of our offerings. Each project we undertake is not just a task but a milestone — one that fuels our passion to innovate, improve, and push the boundaries of what we can achieve.

DESIGNING

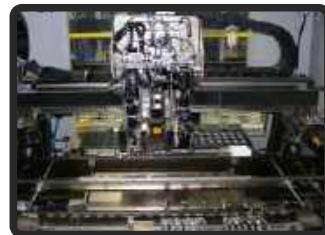

Designing involves curating cost-effective yet industry-compliant products. We ensure that every component selected adheres strictly to the specifications outlined in its respective datasheet, with the objective of achieving optimal performance and efficiency in the final product.

DEVELOPMENT

Product development leverages advanced R&D instruments, equipment, and tools to create prototypes that fully meet customer requirements. Once a prototype is developed, it undergoes rigorous testing, and upon successful validation, it is submitted to the client for final approval.

MANUFACTURING

The manufacturing process involves the mass production of the approved prototype using advanced robotic pick-and-place machines, skilled technicians, and all necessary resources. The final product then undergoes thorough testing before being carefully packaged for delivery.

A Brand By 

For over 50 years, **VANGUARD** has led the way in lighting innovation, evolving from anodizing to advanced LED solutions. Now, we proudly introduce **ILLUTEQ**—our newest brand focused on smart, energy-efficient indoor and outdoor lighting combined with home automation. ILLUTEQ blends modern design with high performance, offering sustainable solutions that enhance spaces while delivering long-term energy savings and reliability. Join us in shaping a brighter, smarter future.

Why ILLUTEQ?

- ✓ **Smart Lighting Design & Setup:**
We design creative lighting plan & solutions and provide expert installation to enhance every space.
- ✓ **Home & Building Automation:**
Easily control lighting & automation with smartly integrated systems on your fingertips & voice command.
- ✓ **Energy-Efficient Solutions:**
Smart lighting solutions to optimize energy use, significantly lowering your power bill while reducing environmental impact.
- ✓ **Outdoor & Landscape Lighting:**
Variety of creative designs to beautifully enhance and illuminate your outdoor spaces.
- ✓ **Service & Upgrades:**
Reliable maintenance and upgrades to keep your systems performing at their best.

Light up your industry in Safe and Smart way

We ILS (Ideal Lighting Systems Pvt. Ltd.) are specialized in Flameproof/ Weatherproof Industrial LED Lights since 2012 based at Ankleshwar, Gujarat.

We are having a wide range of products of LED Flameproof/ Weatherproof Luminaires and FLP Switchgears.

Shape your industry in innovative way

We ICP (Ideal Cleanroom LLP) offers Trunkey Projects solutions in field of HVAC, AHU, Clean Room Panels, Cleanroom Doors, Electrical, Lighting, Flooring, Ducting job, Structural Works etc. since 2018 based at Ankleshwar, Gujarat.

Over 180 products, and the list continues to grow

SMART LIGHTING. SMARTER CITIES. IMMEDIATE SAVINGS.

**Reduce energy costs by up to
70% & enhance public safety
with Panitek Smart Energy.**

The Problem

Traditional streetlights stay on whether needed or not, leading to wasted energy and high costs.

Our Solution

Light. When needed. As much as needed. Panitek Smart Energy provides light on demand, dimming or brightening based on real-time needs. This means lights are only on when & where needed, maximizing energy savings, enhancing safety, & reducing light pollution.

Real-World Results

 Noida International Airport	 TERI Smart Campus	 Pardos Real Estate Projects in Lucknow	 Central Ikon in Noida
1300 smart lights installed, supporting net-zero emission goals.	69% energy reduction, a model for sustainable campuses.	Upgrading urban areas with intelligent lighting solutions.	24 x 7 real time monitoring of air quality at under construction site.

Key Benefits

Energy Savings:

Uses up to 70% less electricity, cutting costs and reducing pollution.

Road Safety:

Brighter lights when needed deter crime and improve visibility for drivers and pedestrians. Emergency buttons can be integrated.

Reduced Maintenance Costs:

Early fault detection due to real-time data of the luminaire status. Smart alerts inform about faults early, cutting repair costs by up to 50%. Longer-lasting LEDs minimize replacements.

Real-Time Data:

Monitoring of air quality, noise, traffic, and weather helps planning and resource allocation.

Sustainable Solution:

Reduces carbon emissions and light pollution.

Future-Ready Technology:

Easily integrates with existing city systems and scales to meet future needs. Hacker-proof technology ensures secure operation.

Longer-Lasting Lights:

All electronic components, including LEDs, experience reduced stress through dimming, which enhances their lifetime by a factor > 2.

“

Panitek's system has brought us energy savings, comfortable lighting, and increased safety.

”

- Dr. Vibha Dhawan, Director General, TERI

Partner with Panitek Smart Energy to build a smarter, safer, and more sustainable city.

INTELLIGENT Lighting Solutions

Core Capabilities of our Manufacturing setup

- ☒ Fully automated RoHS-compliant SMT lines
- ☒ High-speed pick-and-place machines
- ☒ Automatic Optical Inspection (AOI) systems
- ☒ In-Circuit Testing (ICT) and Functional Testing setups
- ☒ EMI/EMC testing setup
- ☒ Surge generator and ESD testing equipment
- ☒ Thermal chamber for environmental stress testing
- ☒ Conformal coating and potting capabilities
- ☒ ERP-integrated traceability systems
- ☒ ISO certified processes

ecoLED

Features

- Compact and Robust design
- CC and CV Drivers
- IP 67 drivers
- EMI/EMC
- 0-10V Analog Dimming
- 3 Step dimming
- 12V Aux Power for smart lighting

Advantage with ECOLED Drivers

- Dedicated drivers Manufacturer
- 15 years of experience
- Inhouse Design and production facility
- 100K+ drivers per month production
- Can do customized drivers
- Upto 350W drivers
- Good after sales support

Powering Brilliance: The Unsung Role of LED Drivers in Modern Lighting

LED drivers are the hidden heroes behind every efficient lighting system—ensuring consistent performance, energy control, and long life. From indoor ambience to outdoor street lighting, drivers regulate power and adapt to different environments. With varying demands for indoor and outdoor use, choosing the right driver is key to reliability and efficiency.

Indoor LED Drivers: Precision Meets Aesthetics

Indoor lighting is as much about ambience as it is about efficiency. Whether illuminating homes, retail spaces, offices, or galleries, indoor LED drivers must support sleek fixture designs while maintaining high performance. Today's top-tier indoor drivers offer:

- Dimmable options (including DALI, TRIAC, and 0-10V) for mood control
- Compact and ultra-slim profiles for seamless integration
- Flicker-free output to reduce eye strain and improve visual comfort
- Thermal protection and long-life reliability

These drivers enable creative lighting designs without compromising safety or durability.

Outdoor LED Drivers: Built for the Elements

When it comes to lighting streets, landscapes, or industrial environments, durability is key. Outdoor LED drivers are engineered to withstand the harshest conditions – from torrential rains to high heat and voltage fluctuations. Key features include:

- IP66/IP67 ratings for water and dust protection
- Surge protection against unpredictable power spikes
- Wide input voltage ranges for global compatibility
- Rugged housings designed for long-term outdoor exposure

These drivers are the silent warriors behind every well-lit highway, bridge, and stadium.

Beyond Function – Driving Sustainability

With global focus on energy conservation, LED drivers are also playing a vital role in reducing power consumption. Advanced drivers not only maximize LED efficiency but also enable smart control systems, making them integral to green building certifications and sustainable urban development.

Manufacturing & Designing of Pcb Circuit Board (PCB) & LED Lights

PCB MANUFACTURER

Our Expertise

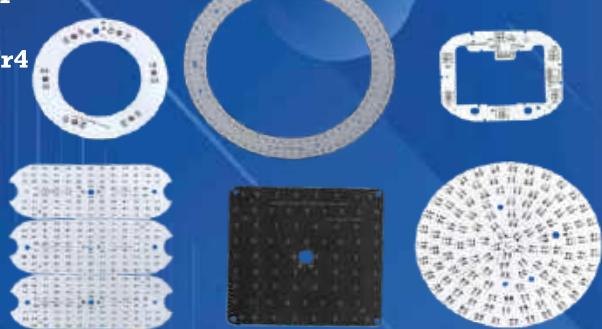

- Cutting-edge PCB design using advanced tools
- CNC routing for precision manufacturing
- Specialized 4-feet PCB for all linear applicable
- Tunable, RGB, and RGBW PCB options for diverse lighting needs
- Rapid sample turnaround – within 24 hours
- 24/7 technical support for seamless operations

Quality That Speaks for Itself

- Materials: Aluminum, Copper Base, Fr4
- Copper Thickness: 0.8mm – 1.6mm
- Thermal Conductivity: 1TC, 2TC, 3TC
- Surface Finish: HASL / TIN / OSP

Advanced Manufacturing Processes

- Hot-air leveling
- Precision drilling & etching
- Curing, screen-printing & routing
- Inspection, testing & deburring

ABOUT US

Welcome to **Beacon Optronics**, where innovation meets precision in the realm of lens manufacturing. Our story revolves around a dynamic team, blending youthful vigor with seasoned expertise, forming the cornerstone of our success.

Our young and experienced professionals bring fresh perspectives and industry insight, driving us to push the boundaries of what's possible. Combined with an advanced manufacturing setup, our state-of-the-art facility ensures the highest standards of quality and efficiency.

Equipped with cutting-edge software like Trace Pro and Light Tools, we employ the latest technologies to design and produce a diverse range of lenses for various applications. From street lights, **Flood Lights** and **highbays** to **stadium lights** and industrial fixtures, our lenses are crafted with a commitment to excellence.

Our expertise and dedication are evident in every lens we produce. We understand that precision is key, and our testing equipment ensures that each product meets rigorous standards before reaching our customers. It's not just about what we make; it's about the impact our lenses have on illuminating spaces and enhancing experiences.

At **Beacon Optronics**, our know-how extends beyond manufacturing – it's ingrained in our culture. We don't just create lenses; we create solutions that redefine illumination. With a relentless commitment to quality and a passion for innovation, we're not just shaping lenses; we're shaping the future of lighting. Join us on this journey where expertise meets dedication, and together, we'll continue to discover new possibilities in the world of optics.

BEACON OPTRONICS INDIA PVT. LTD.

OUR MISSION

At Beacon Optronics, our mission is to be a global leader in LED lens manufacturing. We are committed to delivering innovative, high-quality optical solutions that optimize the performance of LED lighting systems.

Introducing Raytech's Revolutionary Gel-Filled Connectors

Pre-filled

Ready-to-Use

Re-enterable

IPX8/IP68/IP69K Rated

HAPPY™ Mini Accessories

Compact three-entry connectors with non-toxic gel—designed to open, close, and re-enter again and again without wear.

Triple Configurations: Three inlets for rigid or flexible insulated wires up to 4 mm

Re-accessible Gel: Gel never hardens and allows unlimited re-entry for maintenance

Re-usable Design: Snap-in connectors retain full sealing performance even after multiple openings

Little Joint™ Line Micro-Joints

Gel-filled micro-joints complete with connector—ideal for any lighting installation, even in the harshest conditions.

IP68/IP69K Protection: Integrated glands keep moisture out, every time you reopen

Low Profile & Sleek: Minimal visual footprint, maximum serviceability

Unlimited Re-entry: Gel stays pliable, so you can inspect or reroute without replacing the joint

Why Choose Ovistech?

Re-entry Made Easy

Perform inspections and repairs without cutting cables

True Re-usability

Save time and cost—no need to stock single-use spares

Unmatched Durability

UV-resistant, halogen-free gel that performs across -40 °C to +100 °C

Nationwide Availability

Ovistech—your single point of contact across India

OVISTECH SYSTEMS

Office No. 13, Manibhadra Tower, R.G. Patil Road, Indralok Phase 4, Bhayandar (East), Dist. Thane – 401 105, Maharashtra, India.

+91 88792 22860 | info@ovistechsystems.com | www.ovistechsystems.com

Suitable for underwater and underground application

IP68 Rated

Resin-Free

Re-inspectable

-40 °C to +125 °C

Key Features

IP68 Protection as Standard

Dust-tight, waterproof—even under ozone exposure (EN60529)

Extreme-Temperature Performance

Crush-proof PA66-GF housing from -40 °C up to +125 °C

Resistance to flame

Use of PA66 GF thermoplastic materials, glass fiber reinforced UL94 V2NO/5VA

Non-Toxic, Compliant Materials

Halogen-, lead-, and sulfur-free (REACH & RoHS)—ideal for LED applications

Re-inspectable & Re-serviceable

Open, inspect, and reseal without cutting cables

UV & Impact Resistant

UV-weathering tested (EN60079-0), IK08/IK09 rating—even after acid conditioning

Compact Footprint

Fits into tight junction boxes and confined spaces

Re-entry Made Easy

Perform inspections and repairs without cutting cables

True Re-usability

Save time and cost—no need to stock single-use spares

High Temperature UL Approved Wires for LED Lighting Applications from Exotherm

High Heat Resilience

FEF wires withstand extreme temperatures generated by LED arrays, ensuring stable, long-term operation.

Superior Insulation

Their excellent dielectric strength provides optimal electrical isolation, preventing shorts and ensuring safety.

Wires for easy Cut & Strip

Small gauges and high flexibility allow for easy Automatic Cutting, stripping & Crimping, perfect for your LED wire Harness.

MR Technology: Founded in the year 2012, MR Technology is the foremost importer, exporter and distributor of fully inline SMT LED Pick & Place Setup Machines, N2 Generator, PCB Router Machine and Test Chamber Machine.

We/MR Technology selling Qihe brand in India from 2016. Initially we were having table top 2 head/nozzle machine & gradually we developed upto 10 head/nozzle inline automatic machines. We selling Qihe machines only in India not any other brand/make since our tie-up with them. For long-term machine/model support to our Indian customers we have tie-up with Qihe China. Along with Qihe China owner we have formed Qihe India Private Limited company.

Our presented products are highly admired for their longer working life, sturdiness, top performance and affordable rates. Furthermore, our ethical business strategy, truthful dealing, nominal price, well-planned ship facility has helped us in upholding prominent position in the market. Due to high demand, we provide these products to our patrons at nominal costs.

Lighting the Future with Experience You Can Trust

Here's how we can help you take your lighting business to the next level:

- **Factory Setups & Manufacturing Excellence**

- Set up 10+ advanced LED manufacturing factories across India
- Expertise in streamlining production and scaling operations efficiently
- Deep knowledge of infrastructure, processes, and factory optimization

- **Strategic Consulting & Global Partnerships**

- 10+ years advising lighting companies worldwide
- Drive sustainable business growth and market expansion by developing marketing strategies

- **Sourcing & Cost Efficiency**

- Unmatched global sourcing network for components and complete solutions
- Focused on reducing costs without compromising on quality and productivity

- **Business Growth & Innovation**

- Empowering companies with practical strategies to strengthen market position and drive long-term success
- Expand product portfolios with competitive, future-ready offerings

Also served as Business coordinator in China for Moso Power, CEPT and Zvision automation.

Factory Set-up / Business Development Consultant for:

"This journey has been about more than just lights — it's about building strong foundations, forging long-term partnerships, and pushing the boundaries of what's possible. Let's illuminate the future together."

VIVID CONSULTANTS

At VIVID CONSULTANTS, we specialize in providing comprehensive services to the LED lighting industry, catering to both B2B and B2C segments. With a deep understanding of lighting technologies and market demands, we support a wide range of brands and suppliers in achieving excellence through innovative solutions and efficient execution.

OUR CORE SERVICES:

- **New Product Development:** From concept design to product launch, we turn ideas into market-ready LED lighting solutions.
- **Vendor Development & Management:** We identify, onboard, and manage reliable vendors to ensure high-quality supply chains.
- **Product Costing Support:** We help optimize product costs without compromising quality or performance.

PROJECT EXECUTION:

We undertake turnkey lighting projects across a variety of sectors:

- Indoor & Outdoor Lighting
- Industrial & Commercial Lighting
- Pharmaceutical & Cleanroom Lighting Solutions

With a commitment to quality and timelines, VIVID CONSULTANTS ensures that every project is delivered to client satisfaction.
